

Baking Instructions for Thai Fish Cakes

Pre-heat your oven to 350 F or 177 C

Place your frozen Fish Cake on a parchment paper covered baking sheet

Place it in your pre-heated oven and bake for approximately 35-40 minutes (rotating once) until the Fish Cake is warmed through to the center.

Depending on your oven, the time may vary so it is best to check your Fish Cake periodically to ensure it does not over-bake.

Enjoy!
